

DPUTRFDataSmall

DPUTRFDataSmall makes available a partial set of the classifications of the surrounding vehicles (as an alternative to DPUTRFDataFull).

1. Outputs:

<i>StLong</i> [TOKEN]	Longitudinal distance fender / fender [m]
<i>StLat</i> [TOKEN]	Longitudinal distance fender / fender [m]
<i>SpLong</i> [TOKEN]	Longitudinal distance center of gravity / center of gravity [m]
<i>SpLat</i> [TOKEN]	Lateral distance center of gravity / center of gravity [m]
<i>dLong</i> [TOKEN]	Longitudinal distance center of gravity / center of gravity [m]
<i>dLat</i> [TOKEN]	Lateral distance vehicle side / vehicle side [m]
<i>v</i> [TOKEN]	Speed [m/s]
<i>X</i> [TOKEN]	X coordinate [m]
<i>Y</i> [TOKEN]	Y coordinate [m]
<i>yaw</i> [TOKEN]	Yaw angle [rad]
<i>ID</i> [TOKEN]	Vehicle ID
<i>UserID</i> [TOKEN]	Vehicle UserID
<i>Type</i> [TOKEN]	ODB type of the vehicle
<i>Length</i> [TOKEN]	Length of the vehicle [m]
<i>LengthFront</i> [TOKEN]	Length of the vehicle from center of gravity to front edge [m]
<i>LengthRear</i> [TOKEN]	Length of the vehicle from center of gravity to rear edge [m]
<i>Width</i> [TOKEN]	Width of the vehicle [m]
<i>WidthLeft</i> [TOKEN]	Width of the vehicle from center of gravity to left edge [m]
<i>WidthRight</i> [TOKEN]	Width of the vehicle from center of gravity to right edge [m]
<i>LaneID</i> [TOKEN]	Lane position of the vehicle
<i>ax</i> [TOKEN]	Acceleration of the vehicle [m/s ²]

2. Dependencies on other DPUs:

DPUTRFDataSmall must run on a computer together with **DPUTRF(X)**. The DPU *Index* entry for **DPUTRFDataSmall** must be higher than the *Index* entry for **DPUTRF(X)**.

3. Operation:

Vehicle classes (not taking into account the direction of travel)

Figure 1 Simple vehicle classification

This classification is only valid in Courses, which limits the use of DPUTRFDataSmall to Courses. In Areas the DPUTRFDataSingle and DPUTRFTarget can be used to record data of simulated vehicles.

As an alternative to full classification, a classification without taking into account the direction of travel can be selected. The resulting classifications are shown in Figure 1.

Token	No.	Description
AheadNext	1	Vehicle ahead
AheadNextRight	2	in the (same/right/left)
AheadNextLeft	15	lane
AheadScnd	13	Vehicle ahead of AheadNextxxx
AheadScndRight	14	
AheadScndLeft	18	
BehindNext	7	Vehicle following the EGO-vehicle
BehindNextRight	8	in the (same/right/left)
BehindNextLeft	9	lane
BehindScnd	19	Vehicle behind SameBehindNext
BehindScndRight	20	
BehindScndLeft	21
